Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The preliminary amendments received 9/8/03, 7/22/05 and 9/8/05, The IDS received 5/6/04 have been entered. Please update the status of the parent application in the specification. And please inform the examiner as to how the present CIP specification differs from the parent specification to properly determine the priority date of the present claims.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 69-111, drawn to a method of depositing elemental metal in the vicinity of an enzyme, classified in class 435, subclass 25.
- II. Claims 112-128, drawn to a kit for depositing elemental metal in the vicinity of an enzyme, classified in class 435, subclass 975.
- III. Claims 123-128, drawn to a kit for detecting a gene or protein, classified in class 435, subclass 975.
- IV. Claims 129-136, drawn to a kit that contains no kit limitations, unclassifiable.

The inventions are distinct, each from the other because:

Inventions I and II, III, IV are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method could be practiced by hand without any kit.

Art Unit: 1655

Inventions II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions perform different function and contain different components in the kits. Group IV cannot be considered properly as a kit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ralph Gitomer whose telephone number is (571) 272-0916. The examiner can normally be reached on Monday - Friday.
